1936 AGRICULTURAL CONSERVATION PROGRAM
INSULAR REGION

Specifications Relating to Approved Agricultural Conservation Practices For Plantation Farms Pursuant to the Provisions of Section 6(b), Part IV, Insular Region Bulletin No. 1

The following minimum applications during the calendar year 1936 of a gross weight of commercial chemical fertilizing materials (including inorganic chemical substances used as fertilizers) the principal constituents of value of which are any form or combination of nitrogen, phosphoric acid, or potash, will qualify a plantation farm for the payment (50 cents per 100 pounds fertilizer applied, but not more than \$2.50 per acre fertilized) set forth in Section 6(b), Part IV, of Insular Region Bulletin No. 1:

(1) Applications on land on which sugarcane is grown during the calendar year 1936:

A total application on all or part of the land on which sugarcane is grown during the calendar year 1936 equal to not less than the greater of either (a) an average of 600 pounds per acre of all land on which sugarcane is grown during the calendar year 1936 or (b) the average number of pounds applied during the calendar year 1935 per acre of all land on the farm on which sugarcane was grown during the calendar year 1935.

(2) Applications on land on which sugarcane is not grown during the calendar year 1936: No minimum requirements.

J. B. Hutson
